

Requirements Traceability Matrix

InterviewAce — Frontend Team

Project	InterviewAce (Job Interview Prep Tool)
Document Type	Requirements Traceability Matrix (RTM)
Team Scope	Frontend (React / Vite)
Prepared By	Frontend Team
Date	May 06, 2026
Version	1.0

1. Purpose

This Requirements Traceability Matrix (RTM) maps each frontend test case to one or more use cases defined in InterviewAce. Use Case Analysis document. The matrix ensures complete test coverage: every job-seeker-facing use case has at least one corresponding test case, and every test case is traceable to a stated requirement.

2. Use Case Summary (Frontend Scope)

UC ID	Use Case Name	Actor	Description
UC-01	Select Job Role	Job Seeker	User selects a track (SWE, Data Science, PM, or Behavioral) and experience level (Intern / New Grad).
UC-02	Practice Interview	Job Seeker	User is presented with curated questions for the chosen role.
UC-03	Submit Answer	Job Seeker	User types and submits a text response; triggers AI scoring (includes).
UC-04	View Score & Feedback	Job Seeker	User sees 4-axis score and actionable improvement tips.
UC-05	Track Progress	Job Seeker	User reviews answer history, horizontal bar charts, and score trends.
UC-06	AI Coach	Job Seeker	User opens the AI Coach panel, sends messages, and receives conversational coaching feedback.
